

CODEFINDER Shakespeare Summary

Date: March 9, 2026

Claim level: External-safe diagnostic packet

Snapshot

Standalone Shakespeare packet built from the two local Folger witnesses.

Shared folio-sequence images: 53

Included shared pairs: 41

Unmatched Aspley extras: 14

External-safe reading

The current Shakespeare packet offers provisional computational evidence, not a settled attribution.

Source-equivalence constraints remain unresolved because the surviving sonnet mapping is still partial.

Design similarity is not proof of shared physical type.

Current metrics

High-confidence OCR totals: Wright 38,909; Aspley 48,142.

Legacy page-variance diagnostic: 40 of 53 paired images flagged.

Manual review rows: 6; no rows currently rated possible same sort or block.
